

Whole space-group CG transform block-diagonalizes W and X (diamond $2 \times 2 \times 2$ c5; leak_W=2e-13, leak_X=3e-13)

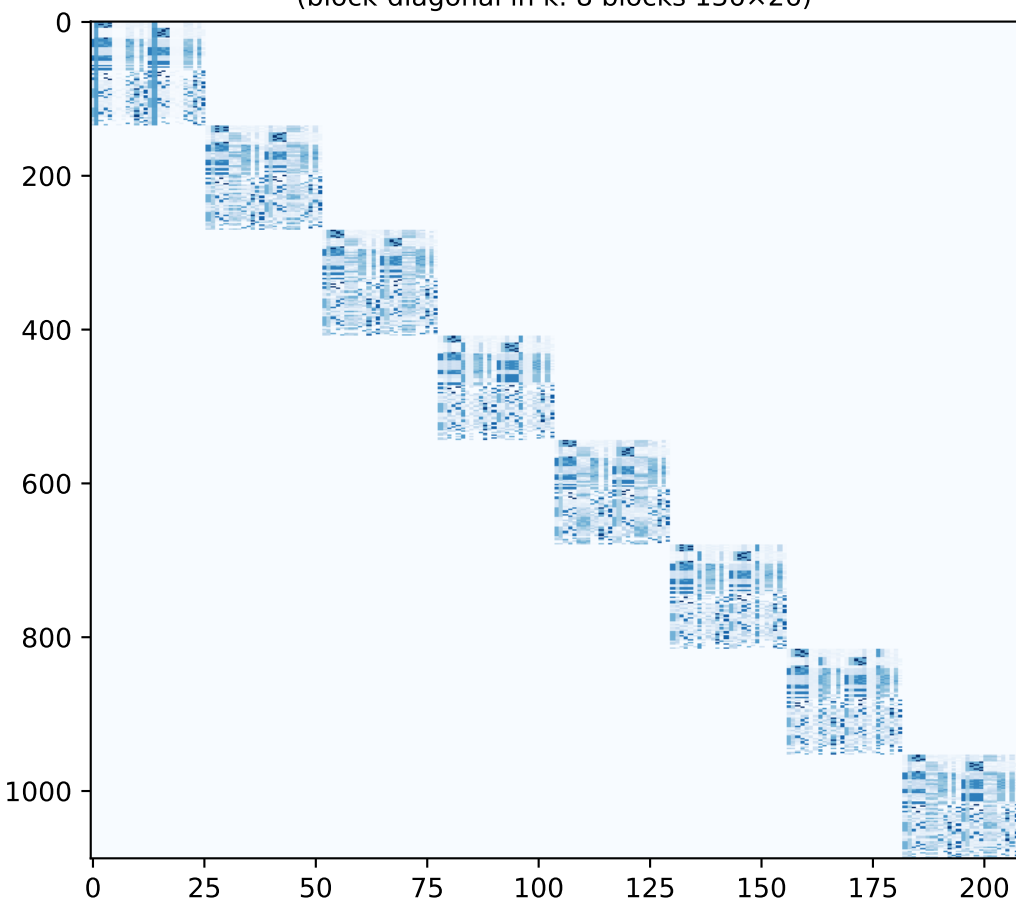

$|W|$ raw basis
(block-diagonal in q only: 8×136)

$|W|$ in CG basis = $\oplus_i 1_{\{m_i\}} \otimes w_i$
(red: irrep i; grey: m_i identical w_i tiles)

$|X|$ raw basis
(block-diagonal in k: 8 blocks 136×26)

$|X|$ in CG basis = $\oplus_i 1_{\{m_i\}} \otimes x_i$
(grid-irrep $\leftrightarrow$ AO-irrep)
