

Cycle 20 Autonomous Report

Date: 2026-05-16

Repository: qc_exciton_LCC

Task selected

Extend scripts/regenerate_synthesis_tables.py --summary to report both n_{blocks} and n_{rows} power-law fits for the shipped synthesis tables.

Major changes

Added canonical fixed- n_{blocks} fits for $I_1(n_{\text{blocks}}=64, N)$ and $W(n_{\text{blocks}}=64, N, b=32)$ alongside the existing fixed- N fits.

Updated the regeneration-script tests to assert that both n_{blocks} -axis and N -axis fit lines are present.
